Sythat Blog management guide

1. About Creating blog

1. Go to
   https://github.com/SythatUm/sythatblog/tree/main/src/pages/blog
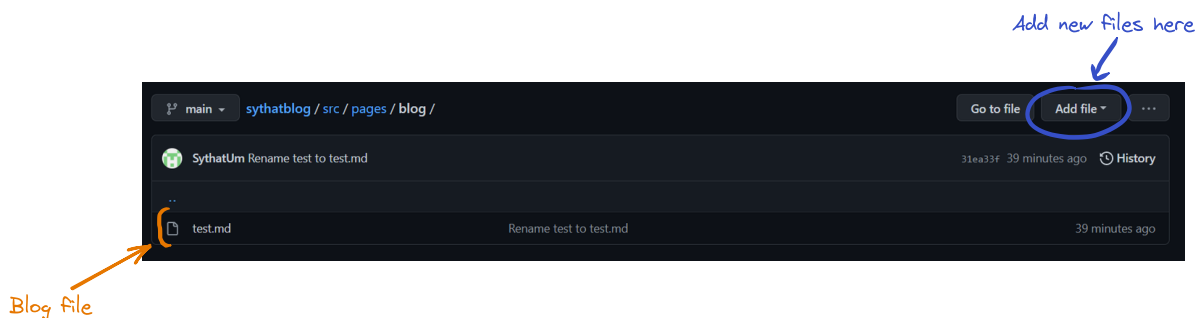

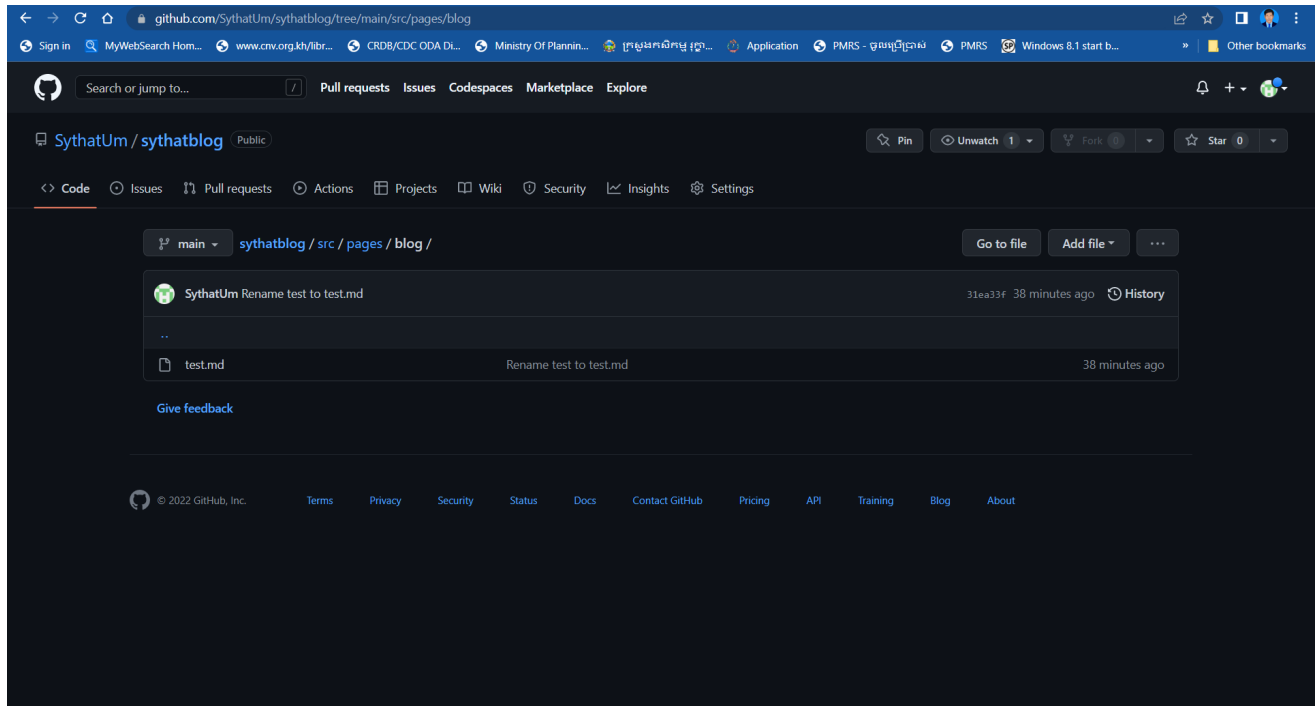

2. Click "Add file"
3. Click "Create new file"
4. Name the file Anything with **.md** at the end

5. Write the blog
   5.1. Copy and paste the following to the top.

```
---
layout: "../../layouts/BlogLayout.astro"
```

```
title: "Something"
publishDate: "2022-11-22T11:39:36.050Z"
image: "https://github.com/linuxdotexe/nordic-
wallpapers/raw/master/wallpapers/ign-0008.png"
category: "Trips"
---
```

5.2. Edit the blog's information (title, publishDate, image, and category)

> ✎ **Note**
>
> - Everything should be surrounded by the double quote sign.
>   Example: `title: "Title of the blog"`
> - for the `image: "URL"`, the URL is the image address. Please
>   check section 2 (About images) for how to use custom images.

5.3. Create the detail of the blog

> ✎ **Note**
>
> - Detail of the blog is in **Markdown**. Check
>   https://www.markdownguide.org/cheat-sheet/ for more
>   information about writing markdown.

6. Save the blog by click on **Commit new file** button at the bottom.

2. About images

You have to upload the image to GitHub in order to get the image link
address that you can use.

To upload custom images

1. Go to https://github.com/SythatUm/sythatblog_pictures
2. Click on "Add file". Then choose "Upload files".
3. Select or drag and drop images.
4. Click on "Commit changes".

Now you have images in your "sythatblog_pictures" repository.
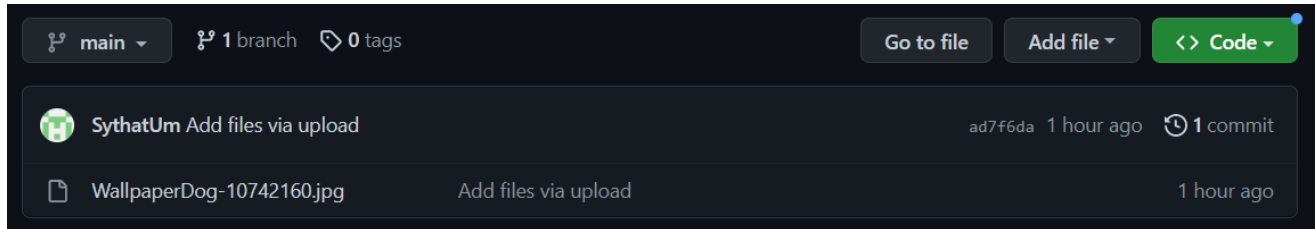

5. Right-click on the image name, then select "Copy link address".

> ✏️ **Note**
>
> - Images' name should not have space
>   Example:
> - 'A fish.png' WRONG
> - 'A-fish.png' or 'Afish.png' CORRECT

To use the image link address after uploaded

For the blog's thumbnail

In the `image: "URL"`, replace "URL" with the link
This will make the thumbnail picture for the blog post.

For the blog's content

To put images anywhere in the blog, please use this line of code:

```
<img src="URL" />
```

With 'URL' replaced by the image link address. This will insert an image at the exact place of the blog.

duis magnis parturient habitant nibh id tristique, quis suspendisse donec nisl
penatibus sem non feugiat taciti. Mollis per ridiculus integer cursus semper
vestibulum fermentum penatibus cubilia blandit scelerisque, tempus platea leo
posuere

Ornare cum cursus laoreet sagittis nunc fusce posuere per euismod dis vehicula a,
semper fames lacus maecenas dictumst pulvinar neque enim non potenti.

> ✎ **Note**
>
> - In the example above, they are the same image because I used the same URL. Different URL will be different image.
> - Please make 1 free line before and after the `<img />` code

Example:
**WRONG:**

```
awjdkwd
<img src="URL" />
jkdwadw
```

CORRECT:

```
djdkwa

<img src="URL" />
```

3. About editing the blog

1. Go to
   https://github.com/SythatUm/sythatblog/tree/main/src/pages/blog
2. Select the blog file and click on its name
3. Click on the **pencil icon (on the right) to edit** or Click on the **Trash bin icon to delete**

4. Edit the Markdown content
5. **Don't forget to click on the "Commit changes" button after edit or delete to save.**
